OJO ADESHOLA OLAJUMOKE

Frontend Developer

ofavourmi55@gmail.com · +234 805 498 6700 · github.com/missfavis-coder · Nigeria (Remote)

SUMMARY

Frontend developer building production-ready web applications since 2024 with React, Next.js, TypeScript, and Tailwind CSS. Across several frontend roles and projects, including GetSkillMD (10,000+ skills generated with no broken pages), I turn requirements and designs into responsive, reusable interfaces and integrate complex APIs and workflows, with a solid grasp of system design, API communication, and state management. I work well under any conditions, whether from a full design, just an idea, or a tight deadline.

SKILLS

Languages: TypeScript, JavaScript
Frontend: React, Next.js, Vue, Angular, Tailwind CSS, Framer Motion, Responsive Design
State & Data: TanStack Query, Zustand, React Hook Form, Zod
Backend & APIs: REST APIs, Node.js, Express.js, Supabase · PostgreSQL, MongoDB
Tools: Git, GitHub, Docker, Playwright, React Flow, Figma

EXPERIENCE

Tekcify — Frontend Developer Remote · 2025 – Present

Started as a Frontend Intern; retained as a part-time Frontend Developer based on contributions.

- Built and maintained production dashboard interfaces for GetSkillMD using React, Next.js, TypeScript, and Tailwind CSS.
- Redesigned the GetSkillMD dashboard, improving usability, responsive layouts, and overall user experience.
- Integrated payment and backend APIs for GetSkillMD, which has generated 10,000+ skills with no broken pages.
- Implemented authentication, OTP-based flows, WhatsApp connectivity, usage analytics, and notifications.
- Worked through Git-based workflows, pull requests, and code reviews on an actively developed product.

Tech: React, Next.js, TypeScript, Tailwind CSS, TanStack Query, Zustand, Zod, Git.

Frontend Developer — Contract / Freelance Remote · Nov 2025 – Mar 2026

- Built and shipped responsive web applications for freelance clients, translating requirements and designs into reusable, production-ready components.
- Worked with the backend developer on Tutoria-Hub, a real-life problem-solving platform, integrating the frontend with backend services and APIs.
- Integrated third-party and internal APIs, handling data fetching, application workflows, and frontend-to-backend communication.
- Contributed to application architecture, state management, and performance optimization across client projects.

Tech: React, Next.js, TypeScript, Tailwind CSS, REST APIs, Node.js.

SELECTED PROJECTS

- **GetSkillMD** — Frontend development and API integration for an AI-powered developer tool, building the dashboard, generation workflows, billing, and account experiences. Platform has generated 10,000+ skills with no broken pages.
- **Scrapify (Workflow Automation)** — Built the landing page and dashboard from scratch, simplifying complex workflows into clear, user-focused interfaces while optimizing for fast page loads and responsive interactions.
- **Tappay (Payment Platform)** — Built and shipped the entire frontend in ~18 hours, owning the UI, authentication, API integration, and deployment, plus a payment activity dashboard. **1st Place, Tappay Hackathon.**
- **Kobo-Core** — Built the financial dashboard and core interfaces from ideas alone, with no finished designs, delivering a sleek, responsive UI. Integrated OAuth, Supabase authentication, and transaction data.

EDUCATION

B.Sc. Computer Engineering — Obafemi Awolowo University Expected 2028

AWARDS

- 1st Place — Tappay Hackathon, Redeemer's University
